

# Weekly Capstone Update Meeting

Nov 17 2022

PA Dept. of Labor & Industry + CMU

### **Goals for today**

- Discuss completed this past week
- Discuss next few weeks

### Completed this past week

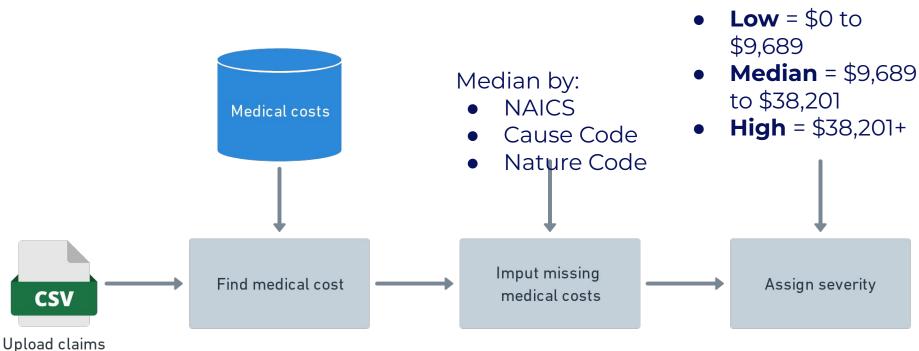

#### November/December

- **23** Sprint 4
- **30** Sprint 5
- **6** Sprint 6
- **13** Sprint 7
- **20** Finalize Build & Break

- Assigning severity
  - Implemented missing medical costs
  - Implemented new severity assignment using medical costs
- Work to implement exporting predictions
- Updated PowerBI Report

# Assigning severity

### **New upload flow**

Jenks breaks:

# Imputing with the median costs

	INJURY_CAUSE_CD	INJURY_NATURE_CD	Median Amount Paid
0	1	1	260.385
1	1	4	418.710
2	1	7	477.780
3	1	10	190.875
4	1	25	298.170
5	1	28	947.980
б	1	30	213.395
7	1	34	16891.160
8	1	36	760.945
9	1	37	286.265
10	1	40	271.070
11	1	42	355.700
12	1	43	676.840
13	1	52	127.615
14	1	54	1138.005
15	1	58	590.470
16	1	59	262.380
17	1	65	392.320
18	1	66	280.850

Cause = Chemicals
Nature = Fracture

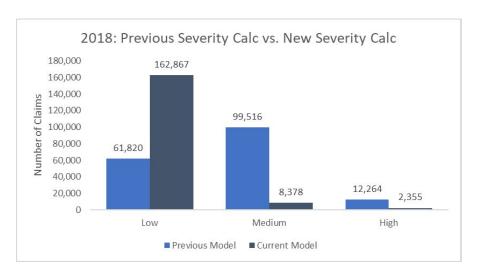

**Missing value = \$947.98** 

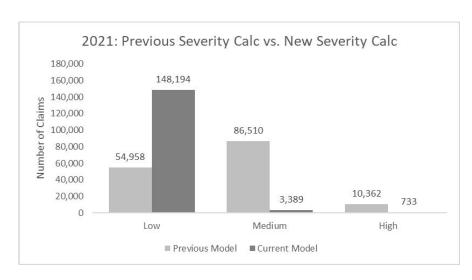

#### Before vs. after

For both sample years:

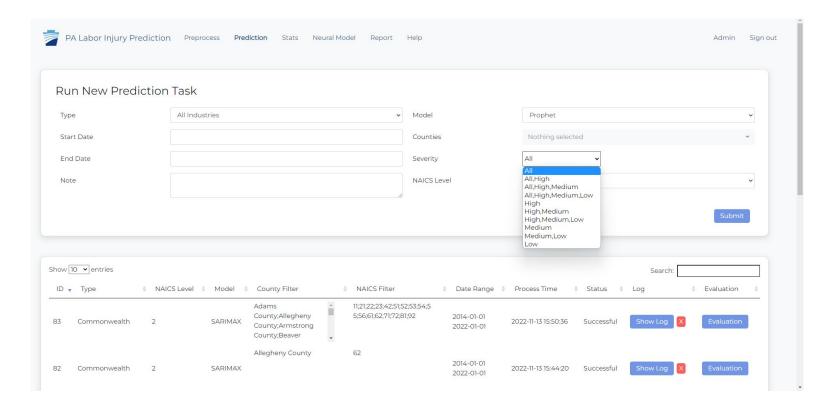

The new severity calculation pushes claims away from "high" severity based on medical cost information

Will enable team to more effectively target "high" severity NAICS or regions

### Select to predict injury rates by severity

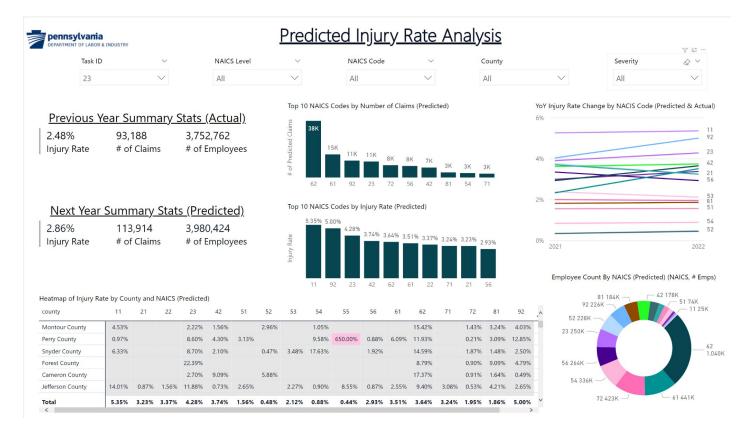

# **Exporting prediction**results

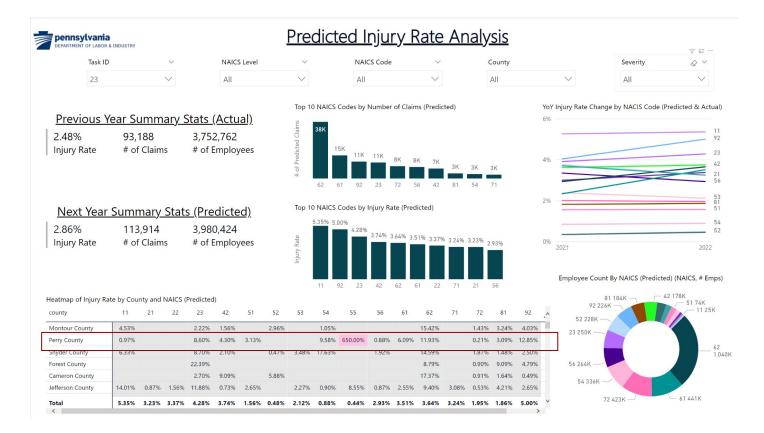

### **Export prediction results**

- Researched about the CSS syntax
- Added a new column for export button in prediction page
- Tested with the existing file directory
- Continuing next week

# Updating PowerBI for easy analysis

## **Analyzing <u>predicted</u> injury rates**

Perry County, at year end, had 2 employees working in NAICS 55 according to QCEW Data

12	2	2

# Injury Rate = # Claims / # Employees

#### In Perry County, NAICS 55:

- 2 Employees
- 13 Predicted Claims

#### Therefore:

- Injury Rate = 13 claims / 2 Employees
- Injury Rate = **650%**

# Model Output Must be Evaluated with Business Domain Knowledge

#### **Discussion**

Does it make sense to limit heatmap to where there are > 1,000 employees?

- What is your feedback on the data visualization for predicted values
  - Keep in mind that the fields available for predictions are:
    - NAICS Code
    - NAICS Level
    - County
    - Year / Month
    - # of Claims
    - # of Employees

# A look at the next few weeks

Nov. 20	Thanksgiving - No meeting
Nov. 27	Onboarding documentation
Dec. 4	Prepare project report & presentation
Dec. 11	Pass off & presentation

Final presentation: Wednesday, Dec. 14 @ 1:40pm

#### **Next** week

- Rest Thanksgiving!
- Merge imputation and severity assignment into repository
- Update Power BI report
- Start onboarding documentation
- Update requirements
